Charmonium results from BaBar

Wednesday, May 16, 2012 2:50 PM (20 minutes)

Chair: Marc Pelizaeus (UH)

Abstract:

We report on several new results involving charmonium and charmonium-like states. This includes tight limits on the production of the charged states $Z_1(4050)^+$ and $Z_2(4250)^+$ reported by Belle, improved measurement of the $X(3915)$, and studies involving the final states $\eta_c \pi^+ \pi^-$ and $\psi(2S) \pi^+ \pi^-$.

Presenter: PRENCIPE, Elisabetta (University of Mainz)

Session Classification: New Hadrons and Spectroscopy Session
